

# Bartosz Sławewski

## Python Developer

✉ bartoszpiotrslawewski@gmail.com    ☎ +48 535 950 567    📍 Wrocław, Poland

📧 bswck    🗨 bswck    🌐 bswck    👤 he/him

Passionate software developer with proven practical knowledge of Python and code quality assurance. Trusted by maintainers of some prominent open source projects critical for the IT industry, including [Poetry](#). Together with an experienced CPython core developer Jason R. Coombs, co-founder & co-owner of [Coherent OSS](#). Life-long learner and enthusiastic teacher, endorsed for the ability to convey specialist knowledge to beginners.

### 🧠 Technical Knowledge

**Domains:** Automation and scripting, Code quality assurance, Web services, Education

**Python:** 3.x, FastAPI, Flask, Django, SQLAlchemy, Pydantic

**Other Languages:** Bash, JavaScript, TypeScript, Dart, SQL

**Containerization:** Docker, Kubernetes (basics)

**Cloud:** AWS (basics), GCP (basics)

**Databases:** SQL, PostgreSQL, SQLite, Redis, MongoDB

**Operating Systems:** Linux, Windows, FreeBSD

### 📁 Projects

#### **skeleton (author)**

*A Python project scaffolding with various SCM and CI/CD automations*

Inspired by [the skeleton project](#) of Jason R. Coombs, to which I also contributed.

- Automated the CI/CD processes in all of my Python library projects
- Developed a Bash script Jinja template for managing skeleton upgrades
- Contributed [several new ideas](#) to [copier](#), the engine of skeleton

#### **configzen (author)**

*A library to validate and edit configurations with Pydantic. Available on PyPI as "configzen"*

- Designed a library for reading and editing configurations within Pydantic models
- Created built-in drivers for processing of JSON, Plist, YAML and TOML (last two in a style-preserving manner)
- Introduced a layer of abstraction allowing to operate on file streams both synchronously and asynchronously

#### **cleo (contributor, maintainer since January 2024)**

*A CLI framework that powers Poetry—a famous project dependency manager, build backend and much more*

- [Co-refactored the entire codebase](#)
- Assigned to create a command-line argument parser for the Poetry CLI

#### **proxyvars (author)**

*Proxy objects inspired by Werkzeug local proxies. Available on PyPI as "proxyvars"*

- Invented and implemented the underlying mechanism and tests
- Adopted in a Discord bot for the aforementioned YouTuber

#### **runtime\_generics (author)**

*A library that facilitates reusing type arguments for generic types at runtime. Available on PyPI as "runtime-generics", used by "configzen"*

- Implemented and documented the underlying idea as well as tests
- Practiced TDD for covariance and contravariance runtime checks

#### **pip-run (contributor)**

*Dynamic dependency loader for creating ephemeral virtual environments*

- [Assigned to design and implement in-memory installation mode](#)

## Professional Experience

### Artur Byczkowski MATEMATYKA

*Freelance Python Developer*

- Initiated a long-lasting cooperation with a popular YouTuber [@apocomitamatma](#)  with 100k+ subscribers
- Designed, created, and estimated costs & delivery time of a full-fledged Discord bot moderating an online community of over 2.7k+ people
- Created and deployed a Flask website within [Phusion Passenger](#) 
- Designed and estimated costs of a modern website currently being built with FastAPI and Next.js
- Recruited the community moderation team and taught necessary skills
- Created numerous YouTube API integrations
- Implemented a [Google PubSubHubbub 4.0](#)  subscriber
- Developed a tool for bulk substitutions in YouTube video descriptions
- Automated the creation of YouTube search tags for over 500 videos using NLP technologies (including nltk, Morfeusz2, ConcraftPL and TermoPL)

### infoShare Academy

*Technical Trainer (Python Bootcamp)*

- Illustrated and led 4 presentations on the Python Object-Oriented Paradigm
- Conducted Q&A sessions regarding the aforementioned presentations

### TVP (Polish Television)

*Multimedia Inserts Developer*

- Created and deployed an offline in-browser fake OS PWA built with OS.js
- Implemented and installed a fake phone call app in Flutter. The application used the phone's proximity sensor to turn off the screen when the phone was held to the ear
- Designed and created 6 different static websites with Bootstrap
- Estimated delivery time & costs of the project

## Education

### Computer Science (Cloud Applications and Systems Engineer)

*DSW University of Lower Silesia*

present  
Wrocław, Poland

## Languages

English (B2) • Polish (Native)
